EQ-1806

com

January 21, 1957

Dear Sir:

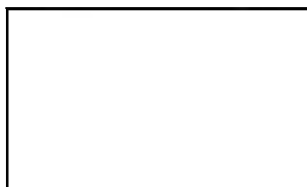

Subject: Contract EQ-1806

In accordance with the Patent Rights clause of the above-identified contract, we have reviewed the work done by our engineers under this purchase order and by all subcontractors doing research and development thereunder. There have been no subject inventions to date.

This statement is made subject to the understanding that we are delivering certain equipment under this contract which is similar to that being developed under another contract with another Government Agency. We have elected to file all patent applications with respect to this equipment as pertinent to the other program. This procedure is equitable as the Patent Rights clause in both contracts are the same and, therefore, the interests of the Government are protected.

25X1A

Yours very truly,

25X1A
